

## ECR Informatique

---

## Tabla de contenido

Fluke Networks is pleased to announce that ECR Informatique, a leading company in the cable installation market, acquired the new Versiv platform, now with a fleet of 7 cable certifiers with **DSX-5000** replacing DTX-1800 in order to consolidate its position and deployment in structured cabling solutions systems at both DataCenters and horizontal cabling levels.

Created in 2001 and located in Calvados (France), ECR specializes in the installation of all types of local network cables (copper, fiber, coaxial, laser) in standard or special environments or subject to manufacturer certifications. ECR acts on behalf of businesses, local communities, public and private institutions (education, health...) on their main site or remote facilities, and is also a subcontractor for major clients taking charge of large scale projects featuring local networks.

ECR Informatique installs, distributes and certifies over 10,000 copper and fiber optic links every year. By preparing projects with the new Fluke Networks ProjeX management system, ECR Informatique saves time not only by managing several projects simultaneously, but also by gathering reports quickly with a single click in the LinkWare software.

With interchangeable modules for testing copper and network links (with the OneTouch module), the Versiv platform allows ECR Informatique to get the validation of installed cabling systems and the maintenance of customer information systems in a faster, more accurate and cheaper way.

"By being one of the first buyers of the new Versiv platform and in particular **DSX-5000**, we move forward with technological developments rather than falling behind. This gives us an advantage over our competitors in complex projects." says Jean-Fred Bachelet, founder of ECR Informatique. "We are used to working with demanding companies that want flawless subcontractors. This starts with the measuring equipment that should be accurate and calibrated periodically as standards require. We have been operating with Fluke Networks' products for many years and we are proud to remain on the forefront of installers."

Fluke Networks, manufacturer and publisher, sells a range of products for the analysis and monitoring of business and communication networks, as well as the installation and certification of copper and fiber optic cabling for computer networks.

## Acerca de Fluke Networks

Fluke Networks es el líder mundial en herramientas de certificación, resolución de problemas e instalación para profesionales que instalan y ofrecen mantenimiento de infraestructura de cableado de redes importantes. Desde la instalación de los centro de datos más avanzados hasta la restauración del servicio en las peores condiciones climatológicas, nuestra combinación de confiabilidad legendaria y el rendimiento sin comparación garantiza que los trabajos se realizarán de forma eficiente. Entre los productos más representativos de la empresa se encuentra el innovador LinkWare™ Live, la solución de certificación de cableado conectada a la nube líder en el mundo, con más de catorce millones de resultados cargados hasta la fecha.
